Statify Analytics
Statistical calculator & data analytics
History 0
Turn raw numbers into clear answers
Paste values, drop in a CSV, or paste a spreadsheet column. Statify cleans the mess, runs the full statistics, and charts the distribution instantly.
DATASET INPUT
Raw

Table
12, 45, 67, 88
91 23 74 56
Commas, spaces, tabs or new lines all work.
0 entries detected
Load sample data
Missing & invalid values
Drop missing / invalid values
Default — skipped entries are counted and reported.
No dataset analysed yet
Load a dataset on the left and press Calculate — results, charts and cleaning summary appear here.
Three ways in
Type values, upload CSV/TSV with a column picker, or paste a spreadsheet block.
Mess handled
Blanks, nulls, NaN and stray text are cleaned by the rule you choose.
Charts included
Frequency histogram and quartile breakdown, exportable as PNG.
Try a sample dataset
